

Needle Felt

Application

For use as the surface of sound insulation or speaker enclosures, cover of working machine cabins or car boots.

Flammability

Meets the requirements of the FMVSS 302 fire standard.

Physical Properties

Material: 100% PES (95% recycled material)

As a surface material, needle felt has good acoustic properties and is therefore suitable for use as the surface of sound insulation or speaker enclosures. The felt can also be used to cover other surfaces such as the control cabin of a working machine or the boot of a car.

Adhesive surface can be added for easier installation.

Weight 350 g/m²
Width 1600 mm
Thickness 3 mm
Colour Anthracite
Delivery In rolls, sheets or cut to form pieces.

Acoustic surface material for upholstery
